

Flange Mounting Options for Water Sensors

7014-FL2_Mounting Flange

Allows for topside mounting of water sensors with a 1.25" BSP thread to SAE 5-bolt (inner circle) or European Standard (outer circle). Can be used with self-tapping screws into metal or plastic tanks if no holes are pre-drilled. Includes mounting gasket.

7014-SHS_Mounting Flange

Made from 316 stainless steel, this mounting kit allows for the easy installation of water sensors with a 1.25" BSP thread. The bottom piece can be used to 'sandwich' the tank, offering more stability in thin walled holding tanks.
